Nicosia – TRNC

Date:11 March 2020

**ANNOUNCEMENT ON THE CENTRAL BANK OF THE TRNC
STATISTICS APPLICATION**

As of December 2019, the “Central Bank of the TRNC Interactive Money-Banking Data” application has been updated and new reporting titles were added, where detailed statistical data on the banking sector of our country were presented.

Central Bank of the TRNC statistics application provides users with the opportunity to report statistical data collected in the Central Bank since January 2006, with dynamic filtering options in time series and excel format. The statistics application, depending on the needs of the users, provides the opportunity to determine reporting start and end dates, consolidated, publicly managed banks, private banks and branch banks breakdowns and periods of data to be reported on a monthly, quarterly, semi-annual or annual frequency.

With the application update as of December 2019, it has been possible to report 23 selected balance sheet items such as Turkish Lira, British Pound, Euro and US Dollars, and the banking sector related information such as the number of branches, number of personnel, number of ATMs, and statistics. Also, 9 new ratios have been added to the performance ratios subtitle, published under the application of statistics that allow ratio analysis.

In order to inform the public in line with the principles of transparency and accountability and to contribute to the scientific studies to be carried out in an academic environment, our efforts will continue to improve and upgrade the application of the statistical data we publish, within the framework of the possibilities.

Respectfully announced to the public.
